| on 1.5°C will form an important part of the Committee's assessment of climate risks and   |
|---|
|   |
| global emissions pathways consistent with climate objectives. What further evidence should  |
| the Committee consider in this area?  |
| ANSWER: The same amount of energy required to melt 1kg of ice will raise waters   |
| temperature from 0 to 80degc  |
| lemperature from 0 to sodege  |
|   |
|   |
|   |
|   |
| In other words-   |
|   |
|   |
| When the Ice caps melt things are REALY GOING TO WARM UP!   |
|   |
|   |
|   |
| Question 2 (CO <sub>2</sub> and GHGs): Carbon dioxide and other greenhouse gas gases have   |
| different effects and lifetimes in the atmosphere, which may become more important as   |
| emissions approach net-zero. In setting a net-zero target, how should the different gases be  |
| treated?  |
| ANSWER:   |
| ANSWER:   |
|   |
|   |
|   |
|   |
| Part 2: International Action  |
| Fart 2: International Action  |
| <b>Question 3 (Effort share):</b> What evidence should be considered in assessing the UK's  |
| appropriate contribution to global temperature goals? Within this, how should this  |
|   |
| contribution reflect the UK's broader carbon footprint (i.e. 'consumption' emissions  |
| contribution reflect the UK's broader carbon footprint (i.e. 'consumption' emissions accounting, including emissions embodied in imports to the UK) alongside 'territorial'   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial'  |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial'  |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?  ANSWER:  |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?  ANSWER:  Question 4 (International collaboration): Beyond setting and meeting its own targets, how   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?  ANSWER:  Question 4 (International collaboration): Beyond setting and meeting its own targets, how can the UK best support efforts to cut emissions elsewhere in the world through international   |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?  ANSWER:  Question 4 (International collaboration): Beyond setting and meeting its own targets, how can the UK best support efforts to cut emissions elsewhere in the world through international collaboration (e.g. emissions trading schemes and other initiatives with partner countries, |
| accounting, including emissions embodied in imports to the UK) alongside 'territorial' emissions arising in the UK?  ANSWER:  Question 4 (International collaboration): Beyond setting and meeting its own targets, how can the UK best support efforts to cut emissions elsewhere in the world through international   |

| <b>Question 5 (Carbon credits):</b> Is an effective glob  | al market in carbon credits likely to       |
|---|---|
| develop that can support action in developing cour  |   |
| should credit purchase be required/expected/allow   | ed in the UK's long-term targets?           |
| ANSWER:   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
| Part 3: Reducing emissions  |   |
|   |   |
| Question 6 (Hard-to-reduce sectors): Previous (   |   |
| agriculture and industry as sectors where it will be  | ±   |
| close to zero, potentially alongside some hard-to-t   |   |
| technologies and behaviour change, how can emis   |   |
| sectors? What risks are there that broader technological  | egical developments or social trends act to |
| increase emissions that are hard to eliminate?  |   |
| ANSWER:   |   |
| Electrify the world. Cars, trains, planes, busses, digg   | ers,everything.                             |
| Massive investment in renewables particularly ons   | shore wind.                                 |
| Cars can charge when there is wind/ solar.  |   |
|   |   |
|   |   |
| Battery density research / investment.  |   |
| , <b>, ,</b>  |   |
|   |   |
| Question 7 (Greenhouse gas removals): Not all   | sources of emissions can be reduced to      |
| zero. How far can greenhouse gas removals from the  |   |
| internationally, be used to offset any remaining en   |   |
| -   | instions, both prior to 2000 and beyond:    |
| ANSWER:   |   |
| Plant forests.  |   |
|   |   |
|   |   |
| L   |   |
|   |   |
| Question 8 (Technology and Innovation): How   | will global deployment of low-carbon        |
| technologies drive innovation and cost reduction?   |   |
|   |   |
| for the UK, supported by targeted innovation policing avertion in tachnologies to reduce or remove an |   |
| innovation in technologies to reduce or remove en   | iissions?                                   |
| ANSWER:   |   |
|   |   |
|   |   |
| Question 9 (Behaviour change): How far can peo  | ople's behaviours and decisions change      |
| over time in a way that will reduce emissions, with   |   |
| sustained global effort to tackle climate change?   | a supportant point of infinitely und        |
| ANSWER:   |   |
| AINO W EK.  |   |

Question 10 (Policy): Including the role for government policy, how can the required changes be delivered to meet a net-zero target (or tightened 2050 targets) in the UK?

ANSWER:

Allow onshore wind power.

Population control.

## Part 4: Costs, risks and opportunities

Question 11 (Costs, risks and opportunities): How would the costs, risks and economic opportunities associated with cutting emissions change should tighter UK targets be set, especially where these are set at the limits of known technological achievability?

ANSWER:

Question 12 (Avoided climate costs): What evidence is there of differences in climate impacts in the UK from holding the increase in global average temperature to well below 2°C or to 1.5°C?

ANSWER:

Crop (grass) failures this year

## **Part 5: Devolved Administrations**

**Question 13 (Devolved Administrations):** What differences in circumstances between England, Wales, Scotland and Northern Ireland should be reflected in the Committee's advice on long-term targets for the Devolved Administrations?

ANSWER:

## Part 6: CCC Work Plan

**Question 14 (Work plan):** The areas of evidence the Committee intend to cover are included in the 'Background' section. Are there any other important aspects that should be covered in the Committee's work plan?

ANSWER:
